

Fear: Mankind's Worst Enemy

Mohsen Paul Sarfarazi, Ph.D.

May 22, 2012

- Mankind has a 'Comfort Zone.' It is being entrapped within what is known and familiar. Any experience that lies outside of such comfort zone incites fear for the humans.
- Fear of new, no matter how enlightening it can be, is still uncomfortable to the mankind.
- Fear is the status of dealing with the frightened inner child that would rather 'hide' within, basked in fear rather, than coming out and wanting to experience changes.
- Being conditioned as such for eons of time not knowing what else is available, has been the 'fate' of mankind in the past.
- Constantly striving to make ends meet while continuously being in fear of survival from apparitions that do not and should not exist have been the status quo.
- Such visions or specters are readily created for us to vividly resonate with us in fear of the probability that something even more drastic can happen to us.
- Instead of being resolved and in control of ourselves to demand what is rightfully ours and is bestowed upon us by our benevolent creator, we seek to compete with one another, belittle one another openly or privately within ourselves to possibly make ourselves feel better.
- We try to engage with one another in a game of greed as manifested through over-pricing, wrongful invoicing, cheating, and deceitful ways to scrounge upon the very minute amount left out for all of us to survive upon as if we are some hungry and needy animals.
- Fear is an infectious disease that if not contained it soon leads us to all kinds of misguided mischiefs as conflict, war, and misery for all.

- Fortunately there is a very well curing formula to heal the disease of fear, and it is readily formulated and gifted to us by our Creator.
- The cure is LOVE; not to be considered as corny and not to be frowned upon, belittled, or treated with suspicion.
- It is LOVE that effectively and instantaneously transmutes fear. It is Love that gives mankind hope, positive energy, and drive to discern the problems at hand with clarity and vigor in pursuit of solution that is right and just without engaging ego, the inner child in all of us which is the weak link and is easily prone to fear.
- Fear has the propensity to fortify and augment itself if it is not met with potency and stamina instantaneously.
- Fear is the main cause of keeping mankind in bondage for the past 13 millennia. Through global corporate dominance and manipulation in almost every possible thing that is of profiteering and monetary in nature such as insurance, food supplies, pharmaceutical, etc., which are deemed as necessities of life as well as luring public to illicit lust and endeavors such as pornography, graphic and even unnatural sex, drugs, alcohol, etc. And when that fails, there is the undisciplined and compulsive shopping, 'the need to have,' and other neurotic and obsessive behaviors that separates us from disciplined spirituality.
- So the type of slavery is diverse and highly beneficial to their means and voracious appetite. It is through exploiting food supplies and essential shelter requirement (housing); it is through total promotion of spiritually and conscientiously harmful practices such as drugs, prostitution, white sexual slavery, gambling and other highly questionable businesses that are completely controlled throughout the globe.
- This way, the seemingly meaningless life of their oppressed subjects, us the humans of this world, compels the masses to seek indulgences in pornography, sex, in gambling, and in consumption of drugs and alcohol. This is a racketeering act which ensures its success through deceitful advertising, subliminal messaging and through mind control and brainwashing using highly technologically advanced ordnances.

- There is no effective defense against all this fear-based suppression but self-discipline, self-security, and self-confidence. Fortunately, SELF is what we are empowered with. We are the most unique ethereal beings from high realm of consciousness encased in the highest technologically advanced physical and biological system in the Universe. We are the crown jewel of creation. We are endowed with the gift of compassion, a gene no other sentient being is equipped in the Universe. Compassion is the catalyst for unconditional love which is the ultimate weapon against fear.
- Do you recall when you feel down in luck and fear begins to permeate your emotional body stripping you from self-confidence, self-reliance, and self-security? What will help in such circumstance? Anxiety? Anger? Violence? Despair? Or these only fuel the flame of fear, insecurity, and self-doubt, and pessimism for the future?
- How about LOVE? Does this give you hope? Calmness? Positive outlook? Encouragement? Vigor? And finally Self-reliance, self-confidence, and finally security?
- It is LOVE and positivity that transmutes all Dark energies, no matter how hopeless and intense things may seem at a given in time. The law of attraction says negative attracts negative and positive attracts positive energies.
- The fear that has been imposed and embedded in us is the result of past 13,000 years of experience in bondage under the duality condition. Its longevity is the result of our lack of consciousness due to slumber, as a result of amnesia, and non-remembrance of who we really are.
- We were genetically down-graded through unplugging of 10 out of our 12 strands of DNA. We have been constantly lied to with misbelief and misinformation; we have been physically poisoned with ingestion of altered food, water, and air, the very essential elements for our survival.
- We have been constantly told that we are not significant, of a lower pedigree, not worthy of or comparable with the blue blooded royalty and that we never amount to anything. We are made to only care about survival under miniscule essentiality condition. In the ancient times and during earlier centuries we have constantly been looked down upon as 'commoners' and 'peasants' and as

laborers. We have been openly taken as slaves to labor and suffer under the non-compensatory employment of our 'masters' and 'superiors' irrelative to our sex, color, nationality, or race. Our women have served as sex-slaves to be preyed upon at any instant in time, no matter single or married. Even up to 3 hundred years ago the 'feudal right of sovereignty' was openly practiced and enjoyed by our masters and oppressors who considered it their sovereign right to 'initiate' our sisters, wife, etc. to lose their virginity to them before being sent to their married husbands. Even married servants were not exempt from this obligation, and they had to 'comply' with the wishes of their masters at any time they took a fancy for such an intercourse. This trend continued on for the African race until less than a century ago in United States and other places. The practice of 'white slavery' is still quite prevalent.

- So, we have been suppressed and abused and looked down upon as less significant (or insignificant) beings throughout our history by our masters and oppressors, and it still openly continues on to this date.
- On the other hand, we are still sovereign in our soul and right of free will individually as well as right of non-interference as a civilization. We have been deceived, miss-guided, preyed upon due to our lack of awakening and appreciating who and what we really are. But, that time is now before us.
- With the aid of our space and inner Earth brothers and sisters, the Galactic Federation of Light, The Galactic Federation of the World (Nibiruan), our ascended master, our angelical guides and educators such as the archangels and other divine personnel, we have been awakening progressively for approximately the past two decades. Our space and inner Earth brothers and sisters, the ascended masters, and the angelical forms have educated us tremendously, helping us to awaken from our slumber to see who we really are and what our abilities entail.
- They all tell us unanimously and by the divine decree of our Prime Creator, our benevolent Father/Mother that we are unique beings of light originating from much higher dimensions initially, the 11th dimension in heaven. We chose to come here in the toughest educational institution in the Universe to experiment with and learn from duality, the interaction between the Dark as

well as Light, where we originate from. The lessons are completed. We have learned for eons and eons. It is time to go home and reflect upon the experiences learned. We can then act as wayshowers and educators for other civilizations who need the same knowledge before they can graduate for their ascension to higher consciousness of existence.

- We have been living in a fear-based civilization that has brought us many pains and hardships. And, there is a great value in pain. It teaches you the value of life, the collective Oneness we all require to be a part of. The Oneness that supplies you with the knowledge and experience of ALL THERE IS without the need for individual trial and error and its resulting education. However, individuality and sovereignty of one is intact without the requirement to submit to a hive mentality. It is the best of both worlds: the right of individuality in thoughts and emotions together with the overall benefit of living in harmony and synchronicity through practice of unconditional love with a collective resonating at the same frequency as one self's.
- It is time we appreciate the gift of compassion bestowed upon us by our benevolent Creator. It is pre-requisite to unconditional LOVE that serves as glue keeping the entire collective together. It is a gift no one else has in the Universe. It is what makes us so unique in the Universe with the widest range of emotional possibilities. Compassion has the highest possible frequency among all possible emotions. It is the characteristic inherent to beings possessing the potentially or highest consciousness possible. And, that is us. The Earth is now prepared to join the higher dimensional consciousness realm of existences through imposition of proper energetic grids and pertinent templates that can resonate with our thought, emotions and consciousness. Starting with 12/12/12 the entire energetic grid will be completed and installed connecting us to the neural network of the Creator, activating our gift of multi-dimensionality, to be able to connect with and communicate with every sentient being throughout our magnificent Universe.
- Our planet Earth will be equipped to surf the realm of higher dimensions up to the 9th dimension. Currently there are choices of ascending to 4th, 5th, or 9th dimension depending on our vibration rate. The energetic grid will have the

potentiality of expansion and contraction only which currently limits us to the 9th dimension. Above the 7th dimension (and thus 9th dimension) there are no needs or requirement for physicality or existing in a particular physical form, human or otherwise. The choice is optional and resides with the soul only. In the 4th or 5th dimension, however, there is a need for a physical body to encase the soul. However, this body becomes progressively less dense in nature. We shall attain our LIGHT BODY which signifies LIGHT as well less dense and light by 12/12/12 or shortly thereafter, depending on whether we have acquired the required vibration frequency to anchor and reside in such higher dimensions.

- The restriction to stay within the 9th dimension of consciousness or lower persists until year 2024, when there will be another phase in transformation and ascension. After this time, Earth will acquire a much more sophisticated energetic grid system, one this capable of not only expanding or contraction but also spinning about this axis. The advent of such an occurring opens the gateway to the 4th harmonic universe as well which is he home for our Avatars. The details regarding the 4th or 5th (realm of our Rishi) harmonic universes have not been furnished yet. It is presumably above the level of current understanding regarding even envisioning the mechanics or physics of the Cosmos. It involves inclusion of higher spatial coordinates, possibly involving not only the linear translational and rotational aspects of the coordinate systems but also the tensorial interaction of the two, meaning the effect of translational geometry on rotational phenomenon but also vice versa. To comprehend beyond 3rd dimension is currently what mankind strives for and we shall leave it to that.
- And the Universe is waiting for the mankind to explore its wonderments; and all is up to us. The only enemy, the only dissuading factor is **FEAR**. Fear is the worst possible deterrent in achieving higher vibration rate which is inherent to attaining higher consciousness.
- Fear can manifests itself in a variety of venues. One that haunts and damages mankind's emotional and physical body is through DNA/RNA degradation. This is usually through past and present life Karma which embeds itself in the

genetic system as a way of recording memory. These need to be cleared and emotional body cleansed from their presence and interference.

- Through the inpouring of divine energies emanating from the galactic core, our solar system, and other planets, galaxies, and even other Universes which are all alive with highly sentient souls, as well as with the aid of other sources of lights emanating from the space ships of our brothers and sisters who are presently close by we are currently in receipt of the download codes that recode, realign, and activate our 12 strands of DNA. However, the emotional body must be first cleansed from fear, anger, anxiety, and other forms of negative energies for us to be able to effectively reactivate our superb genetics and wondrous other biological traits such as having pineal, pituitary, hypothalamus, and thymus glands. These all rejuvenate our multi-dimensionality and higher dimensional capabilities as well as awaken our gift of compassion and other dormant or atrophic traits.
- Quite simply fear is to be avoided at all costs as it is the single enemy that will tether and binds us to 3-dimensionality and the further burden of duality. It will be like repeating a course of studies over and over again until no drive, enthusiasm, or even tolerance is left in us regarding its echoing or recapping.
- Sadly, mankind is prone to fearing the unfamiliar and the unknown. And fear creates anxiety and suspicion. It triggers a phony sense of self-defense to doubt, frown upon, and even ridicule what has not been consciously known to man. To understand the mechanism of fear better, it awakens a weary, unwise, not-knowledgeable, and frighten inner child known as ego that rants and raves to find comfort and security by first attacking the source of fear and subsequently denying and devaluating the new source of knowledge that can otherwise prove to be enlightening, enticing, and productive for us.
- Remember, fear always works in concert with ego. To validate it is to listen to the temper tantrum of a toddler within you. It has to be disciplined with firm intent as is worthy of a wise parent. The new knowledge must be met with patience and acumen. Even when the discernment inclines to doubt or lack of definite instantaneous positive resonance, perseverance and further research or intuitive comprehension must be employed. The grasp and appreciation of

new knowledge or information is always encountered with withdrawal tendency and the easiest answer to say no without further investment of time and energy in order to correctly understand and resonate with the new phenomenon. One sure methodology to “not-miss-the-boat” is persistence and allowance for familiarity. Rest assured, once the initial outburst of the ego is tolerated with wisdom and is controlled, further application of intuitive senses and acquirement of further knowledge through research or consistent incitement of the same will lead to proper discernment, aligned with the wisdom and knowledge of the inner soul. It will simply resonate or will not resonate with the truth within. Of most importance is to stay focused without submitting to impulsive fear and any prejudiceness and subsequently practicing insistence until resolution is reached within. Accomplishing this, may indeed lead to self-enlightenment and new ventures and directions in life which is out of the ‘norm’ or is ‘outside the box.’

- To recapitulate on this, you have lived in duality and bondage during the past 13 millennia. You live in a fear-based society in which the fear of ‘survival’ or fear of consequences, punishments or penalties by incarceration has been embedded in you. You are constantly threatened, given fines, and made to fear authority and what might be coming to you in the future such as fear of tax penalties and interest plus imprisonment, fear of getting traffic ticket or go to court, etc. You are treated with utmost disgrace making you believe that you are nothing and you are at the mercy of others who are superior to you and can change your fate instantaneously. The sad thing is that these individuals are us. Empowered by the thirst and ego to subjugate others to their will and perhaps use their power to sooth their own wounds they turn on the very same people who can be in their own collective supporting one another. And, thus the Dark energies propagate and consume the masses. Anger, anxiety, competition, suppression of one another, and even violence becomes the ‘norm.’ And, the masses only see each other as a source for competition and fight for ‘survival’ or attaining illusional prosperity by cheating one another and directing their hatred and anger to one another even irrespective of race, color, ethnic, or national origin. It has now become epidemic. It encompasses ALL. And, the society has been seeded with such

Dark tendencies by corporate oppressors who rest comfortably and are assured while reeling in their exploits and profiteering harvest diligently and whole-heartedly labored by the masses. And what is disconcerting is to see the very people who “feel” the burden of their hard labor direct their anger of exhaustion to others who could be living in harmony and joy with one another.

- The truth of the matter is that our Prime Creator has supplied us with abundance and full prosperity for ALL. There is no need for competition with one another. There is enough for everyone once you consider the other 95% plus wealth is distributed among all of us, from starving people of Africa, to the hard working or peasants of Middle East, to every soul inhabiting this beautiful blue planet of ours. There should be no taxes, other than what is expended in creating comfort and prosperity for the masses, which is quote transparent and requested and readily verifiable by every one of us. No resources are to be spent for any weaponry and war efforts. Nations do not have problems with one another and can easily get along and resonate with one another, living in harmony and synchronicity with each other. It is the few war-mongering, profiteering, malevolent, predatory, self-indulgent and uncompassionate few who instigate wars for profit; for selling of outdated useless weapons to both side of the warring façade; for ensuring that the resources are depleted and to further enslave both sides for begging to be financed and supplied by the same few; and finally by vampirism act of devouring light energies of the poor people caught in the web of unfounded futile conflict.
- Wars create further agony, further famine, further dependency on the Cabal, and most importantly more FEAR. Fear is catalyst for all negative energies and all catastrophes to manifest in one’s life. Fear is the chain, the yoke, the rope that binds mankind to slavery. It needs to be cut and destroyed for mankind to have a chance for further forward evolution as we have reached a stage that we can no longer be kept in bondage. And no amount of food and drug poisoning can ensure our further enslavement.
- As to subliminal advertising and messaging, mind control, and brain washing, they can no longer bind us to any chains woven with lies, deceits, censorship, misinformation, etc. Many are awaken and are watching. Soon others join in.

For all who see through the veil of deceit, conspiracy and mankind's enslavement it needs to be emphasized that all problems germinate from FEAR and it is FEAR that needs to be eradicated, whether it is the fear of unknown, the fear of meeting 'aliens'[who are actually our space brothers and sisters], or feel of change, fear of progress, or fear of becoming Galactic and live among our space brothers and sisters and other sentient beings forever in peace, tranquility, harmony, in freedom and in prosperity resonating with high frequencies that are worthy of a Galactic civilization.

- It is true that we have lived in bondage for millennia. However, it is us who has chosen to be in it, whether subconsciously or not to be encaged and live in shackles. It is time for mankind to appreciate what a magnificent being he/she was designed to be. We carry the sophisticated genome known to this Universe. We are capable of feat that we have only imagined in fantasy during our physical endeavor. To name a few: flight, instant manifestation through thoughts, teleportation, cloaking, telepathy, clairvoyance and less awe inspiring such as telekinesis and telepathy. With adequate practice we can also master the art of remote viewing and bi-location. However, remember that the greater you expand into such endeavors the greater energy you carry, and with greater energy comes responsibility. In any case, it is readily seen that our capabilities are far greater than the mortal weakling we envisioned ourselves in all these years. The energies are unbounded in the Universe, and being an entity of Light the bounty is endless as long as we remain in Light and use our powers with care and responsibility for the good of ALL, in benevolence, and without self-indulgence or harm to others. The minute we venture into such self-service and selfish acts we are diminished to less beings, worthy of such low level of consciousness as depicted by our behavior.
- With this introduction it is indeed apparent that it is unbecoming of us to remain in the shackle of our oppressors and enslaving for others who are constantly enriching their exploits. These oppressors actually carry very little light. It would take millions of years of evolution for them to reach our state of divine consciousness. Since they cannot receive Light, and receiving Light is essential to maintaining consciousness, they resort to stealing Light energies from sentient beings of Light such as us. And, they achieve this through inciting

fear by creating wars, conflicts, and other avenues which causes dissipation and robs us of valuable Light energies from our auric system. This is the form of auric bleeding that has served them to survive and indeed thrive in further carrying out their malevolent deeds. So, not only this deprives us from our precious Light energies that will serve to be our primary source of power in performing our magical feats, it also harms the Light by indemnifying the Dark to further continue with their acts of abomination. By depriving them from engaging in parasitic act of vampirism we can actually drive them towards the Light for their survival. It may take many millions of years of good deed and service to the Light; but it is a start and a move in the right direction.

- Mankind is magnificent and is blessed with the powers of thought and emotions like no other being in the Universe. Through the power of firm intent, eradicating any doubts and coupled with benevolent intentions for the betterment or service to ALL we can create anything we set out our mind to. This is a revelation that is extremely difficult for today's man to comprehend or digest. It is so much out of the boundary of the norm which is so much filled with medium of fear that is hard for mankind to fathom. With the dissolution of fear, anger, anxiety, jealousy, greed, and all other negative Dark energies, and through the present process of ascension entailing the recoding, realignment and activation of our 12 DNA/6 RNA system, as well as awakening of our primary tri-gland system of pineal, pituitary, and hypothalamus we will soon gain multi-dimensionality capability and accelerated forward evolution. This corresponds to a higher vibratory rate with higher consciousness and higher LIGHT Quotient. The time has come to abandon fear and condemn it to low consciousness where it belongs.
- Last but not least, we have a group of benevolent brothers and sisters from our own inner Earth as well as the Pleiades-Sirius Alliance where our ancestors first were evolved, Arcturus, as well as other galaxies such as Andromeda, etc. and even other Universes to assist us with process of ascension. They are here to guide, educate, and see that our desires are promptly manifested in physical reality. However, they are not here to either make decisions for us or dictate to us what to do. We are a sovereign civilization guaranteed with right of 'Free

Will' for each individual and protected by the right of non-interference as a collective.

- The individuals who are here to aid us are here by free will and most of them have ties with people currently incarnated on the planet Earth. Latest survey indicates the 75% of the current inhabitant of Earth come from outer space. These are the close family of the members of Galactic Federation and other planetary system who are currently visiting us. And, this is why they are here; to take their friends and families home. They have been awaiting the awakening of their families and friends for the past decade or so. They incarnated here as a part of the 'starseed program' in order to raise the overall consciousness of planet Earth so that she may ascend to the 5th or higher dimensions of reality. Each starseed has a 'life contract' that he/she must abide by. The objective was to become awakened and participate in 'light working' activities as to aid the people of Earth in their ascension. Unfortunately, currently many starseed are either fast sleep in slumber having forgotten the terms of their life contract or basking themselves in the diversity of life of Earth which no other star system can provide. They have been mesmerized by our opulent, self-indulging way of life that is available to few and they have totally forgotten about the role of duality that it plays in the lifestyle of the earthlings as well as their mission for their present incarnated life. Luckily up to present 15% of the awakened masses correspond with the people of Earth on the surface with the other 10% being associated with the people of the inner Earth.
- What is important is to note that our space or inner Earth brothers and sisters do not mean to suppress us. They are not here to take what little we have in terms of resources and our technologies. They are of higher consciousness and they are far more advanced than we are. They have complete freedom and they can go wherever they like to. There is nothing that would make them stray from their benevolent ways and create karma and the wrath of heaven upon them. One of the groups of sentient individuals who are currently parked or residing in our solar system is the Ashtar Command. This highly advanced command system is comprised of a gigantic ship with over 200,000 personnel under her commander 'Ashtar.' The Ashtar Command serves as God's Peace

Corps which constantly traverses the northern part of the Universe also consisting of our Milky Way Galaxy in order to maintain peace within its territory. The objective of the 'Force' is not to assault or engage enemies but to effect peace and order so different civilization stop fighting with one another and maintain peace as to ensure safety and tranquility for all the citizens involved. The work is usually done through peace negotiation and without arousing conflict. However, the Ashtar Command is equipped with latest offensive and defensive military capabilities and they can defend themselves and assert peace and order if needs be. Another responsibility they are engaged with is to assist civilizations throughout the northern hemisphere of this Universe with certain needs they might have only as result of invitation and request. They do not interfere with the affairs of any civilization as to interfere with their evolutionary process. The same goes with regard to maintaining the right of free will of all individuals within their territory.

- Despite all these facts there are those individuals who being plagued by the negative energies of suspicion and doubts have engaged themselves with the act of disparaging and unduly slandering the benevolent efforts our inner Earth and space brothers and sisters by creating panic and adding more fear to an already fear-ridden civilization regarding their personal contact via landing their ships on our soils. It is through this personal and one-to-one contact that many things can get done regarding upgrading our society to a Galactic Civilization for which we have been already nominated and considered.
- It is through personal contact that they can present us with our Gifts from the Prime Creator which includes advanced technologies such as free energy, levitation, teleportation, communication and other devices. It is through personal contact that they can instruct us with the effective use of such technologies. It is through such a contact that we can learn the etiquette of becoming a Galactic Society.
- Our inner Earth and space brothers and sisters are not a threat to us, and there is no reason to fear them whatsoever. It is not our visitors that are the source of fear for us; it is what lies within as described previously. It is time

that we believe in our powers and take our position within this vast Universe of ours.

- Our visitors are here to help us with the education, knowledge of how to raise our vibrations rate in order to be able to ascend to the higher dimensions. They are here to help us establish a better government and lifestyle worthy of joining the Galactic Federation of Light as a member. They are here to supply us with advanced technologies. They are even here to help us with our problem with the Dark Cabal. They have delivered what they have promised; but they will not openly interfere in our affairs; they will not trespass on our sovereign land; and they will not physically fight our battles by engaging with the Dark Cabal. To put it succinctly they are here to assist, to facilitate, and to present us with the gift of new technologies and know-how; but they are not here to do it all for us. It is up to us to awaken, to intend and to do it ourselves. Once we show our clear intents, the sky is not the limit, and everything is possible then. They are here to ensure all our desires are manifested. However, the initial step is to trust them and treat them with respect. They completely understand our fears and the source they generate from. They are highly patient and they here in service to God and Humanity. They are benevolent and they are forgiving. Without our invitation they will not openly interfere in our affairs. They have already done everything possible in our slumber to avoid Earth from catastrophic disaster, be it the arrival of Comet Lee or Comet Elenin, the encountering of the Planet X or Nibiru, the arrival of the photon belt, the solar flare from our sun or the central sun Alcyone, massive earthquakes, tsunamis, tornados, hurricane, the reversal of the Earth's magnetic poles, etc. They continue to monitor the progress of Earth's ascension to the 5th dimension; but they will not interfere in our affairs unless they are invited by the Earth's majority or a representative agent of our planet.
- In closing, we need to eradicate fear, start to see ourselves for the powerful, godspark, magnetic beings that we are, and welcome our brothers and sisters who are doing their best to see us succeed and consequently fulfill their mission of service to humanity and to the Creator. They are under the watchful eyes of the Ashtar Command and the heavens. Nothing is done unless expressly approved through the heaven or divine realm. When there are

questions regarding the unusual characteristic of this ascension, such as the question of mass ascension or the question of bifurcation into different parallel realities constituting 4th, 5th, and 9th Earths, the final answer and approval resides with the Prime Creator and no less. WE ARE IN GOOD HANDS INDEED.

- The most important contribution you can give to Planetary Ascension is to REFUSE to participate in any form of fear. This includes all forms of anger, depression and negativity.
- Again, doubt and fear are two major blockage frequencies that prevent manifestation of our desires. In a very real sense, all negative emotions are at primal core, fear based.
- Overcoming fear, and replacing it with LOVE, particularly true acceptance and love of self, is a key frequency needed to Master duality.
- The Pineal is the system of entry into divine, and it is a complex crystalline computer that screens frequencies. This is the forgotten information. It is time to remember, time to know. It is now 2012, approaching the time for ascension.
- When you have Divine Wisdom, you have knowledge and there is nothing to fear.
- There is not a thing, any element, any principality that can ever threaten, enslave, or intimidate you.
- When fear is given knowledge, it is called enlightenment.
