

Influence of Extraterrestrials

Mohsen Paul Sarfarazi, Ph.D.

March 7, 2012

- There are large numbers of our brothers and sisters from other star systems living among us.
- This presence occurs in several ways:
- First, by soul replacement also referred to as 'walkins.'
- This takes place when one of them exchanges their soul for the existing soul of one of us.
- There are many beings from different star civilizations who are functioning on our planet in this way. There is a period of adjustment ensuing for both the Earth human and the extraterrestrial as the newly implanted souls get used to their new bodies and surroundings.
- When this occurs the extraterrestrials often work as a lightworkers.
- Others occupy positions of influence unpretentiously.
- Second method is by incarnation. In this case, at the time of the birth, one of the extraterrestrials from the stars takes the body of an Earth human being newly born. When this occurs the ET agrees to erase the memory of his (her) past lives within one month of the time of his (her) birth. However, over the course of his (her) life on Earth the ET becomes awakened and conscious of his (her) true origin.
- These ETs have extensive background and experience on diverse star systems volunteered to come and incarnated on our planet as a part of 'the starseed project' to assist us with process of transformation.
- These individuals currently live among us on Earth.
- Thirdly, there are countless members of varied star systems who closely resemble us that they can reside among us unassumingly and without causing any alarm.

- Upon close inspection of these entities, one may notice subtle differences in their facial characteristics or their expressions, particularly in their ocular features.
- There are also ancestors of Earth's surface humans who live underground, in secured communes in several sites in the hollow section of Earth.
- These individuals are collectively known as 'Agarthans,' and naturally, thoroughly resemble current Earth humans.
- They are, however, of a higher frequency and are not readily detectable by us.
- They generally do not have any interaction with us as the 7 gates or openings between the Agarthans and the current Earth surface dwellers are sealed and closely guarded. Very few of us know about our close brothers and sisters of the inner Earth. They perceive us as 'primitive' as they live in Light and love while we are a fear-based society plagued by ego, greed, violence, and karma; indulging ourselves with materialism and carnal desire; living in, apathy, separation (from God), slumber, and oblivion; subservient to a Dark, lowly, parasitic race of beings.
- Many who are direct descendants of the ancient civilizations of Lemuria and Atlantis also currently live on the Earth's surface.
- Strictly speaking, one may not classify these individuals as ETs as they are more part of Earth's history than anyone else. More precisely, we are all ETs as far as authentic indigenous population of Earth is concerned.
- As humans, we were all evolved in Lyra, in the Vega System approximately 7 million years ago.
- There are also those who do not essentially resemble Earth humans. These are sentient beings, but their physical appearance is dissimilar to us. They are currently present in huge numbers aboard a multitude of starships that are now orbiting our planet. These entities come from a variety of star systems and generally do not live among us.
- Moreover, there are a large number of ETs who commonly walk among us each and every day. They are of a higher frequency and generally they cannot be detected by us with our rather limited 5-sensory perception.

- However, as our frequencies increase rapidly every day we might be able to distinguish them soon.
- Alternatively, those of us who have a great deal of sensitivity and consciousness may be able to “feel” or sense them intuitively.
- Also, those Earth humans who presently have similar high vibrations that resonate with them can “see” them.
- There are millions of ETs, space brothers and sisters, incarnated, walk-ins, look-alikes, and beings of higher frequencies, who are currently on our planet Earth.
- These individuals are all here to help witness Earth and her human inhabitants ascend.
- Some have a strong kinship with us because they participated in the ‘starseed project’ and therefore have their families currently living among us.
- Alternatively, there are other millions who watch us closely from their space ships orbiting our Earth above us who are here sympathetic to the principle of giving “service to others.” These beings are here with the primary goal of offering assistance to us while we undergo our Transformation.
- There are also those of lower energy parasites who, in cohort with the Dark energy entities and in favor to “service to oneself,” are allied with the Dark Cabal and are acting against the ascendance of Earth humans.
- Adherence to the Light or duty to the Dark is a matter of free will, and generally speaking, not an inherent characteristic of a particular race or species.
- Thus you will find individuals of races or group of us that are generally considered to be of service to others or service to self-acting in ways opposite to the majority.
- In this respect, it should be clear how much influence the extraterrestrials currently have on our daily lives, state of consciousness, interim transformation and on our eventual ascension.
- The starseed lightworkers and other sentient ‘ETs’ currently present on our planet constantly interact, debate, and negotiate with the Dark Cabal and the various governments on Earth to effect a resolution to the problem of the

breakdown of our financial systems. More directly, the purpose of these conferences is to confound the Dark Cabal into a position that they are faced with admitting and taking responsibility for their illegitimate wrongdoings, and to drive them to a position of flabbergast, recognition and acceptance.

- Witnessing the rather unprecedented number of resignations of the CEOs of foremost financial institutions around the globe over such a minuscule period of time of late is a testimony to the success of our Galactic friend's efforts.
- This is a tremendous achievement by our space brothers and sisters in lieu of the fact that the Dark Cabal had infiltrated virtually every sector of the government and legal structure to the point that they practically 'owned' the system.
- The aforementioned task is further convoluted and exasperated by the conceit, egotism, and pomposity of these problematic and pig-headed individuals who remain adamant to any 'rhyme or reason.'
- Our space allies have been sending messages via 'channeling' which have been extremely helpful in educating and effecting awareness regarding the status quo of spiritual, social, and political aspects of surroundings in a tremendously large number of Earth inhabitants.
- For those who have cast aside fear, paranoia, distrust, and cynicism, this has culminated in progressive awakening steering them to a more sentient higher conscious beings.
- Those who have been reluctant to 'listen,' or to any changes, to a transformation linger in lower frequencies of vibrations.
- Perhaps the single most significant outcome of our space allies visiting us is the disarmament of major underground arsenals of the Dark Cabal who have long been preparing for a 'New World Order (NWO)' and genocide of our innocent population.
- The 'holocaust' like camps and dwellings as well as their underground nests of sick genetic abomination are now empty or hold the minions, the collaborators, the servants, and the culprits of their diabolic schemes of hegemony and bigotry.

- Our space brothers and sisters, particularly the Ashtar Command, have all been most compassionate in driving away the Greys, the Annunaki, the Draconians, and their other underlings from the face of Earth and our solar system.
- These creatures had penetrated and intruded the space, the ground, and subterranean of Earth without any invitation or consent of Gaia or the majority inhabitants of Earth.
- This is in direct violation and sacrilege of the Creator's decree regarding the 'law of non-interference.'
- The Greys had been subverting Earth and her inhabitants ever since early 1954 as a result of an illicit agreement with the government of United States (and later Russia) for abducting and genetically experimenting on humans and certain other animals and livestock of Earth.
- As far as Earth humans are concerned this is yet another example of blasphemy and irreverence for the Almighty and it is in direct conflict with the 'Law of Free Will.'
- Suffice it to say that no one that was snatched or kidnapped had given permission to either the government of United States or the Greys to have them violated.
- Our space allies have been equally empathetic toward the problem of chemtrails being spurted upon us by the Dark Cabal.
- The purpose of gushing or jetting these chemicals into the atmosphere is to chemically stimulate the release of naturally manufactured chemicals within the body as to make people apathetic to everything. Inordinate discharge of such biochemical as dopamine, etc. causes a state of indifference in the person as to not care about what is transpiring in his (her) surroundings. This is exactly contrary to self-awareness or consciousness. In this respect, these chemtrails have the effect of diminishing one's natural frequency of vibration.
- This is most deterrent to humanity at present who is currently in an era of transformation to higher consciousness and ascension to higher planes of existence. The aim is partly to contradict, retard, and even neutralize the process of transition to higher frequencies in humans. In essence, the person

always resonates with lower frequencies. The individual 'feels' sluggish and even lethargic without much concern about his (her) immediate environment and status quo.

- Another devastating side effect of chemtrail burst is that the chemicals attack and weaken or destroy the immune system of the human being.
- The result of a recent account of extensive and 'out-of-control' chemtrail spray in Los Angeles culminated in numerous deaths of individuals and immeasurable emergency cases. These incidents occurred to the extent of runoff in all hospitals and medical crisis centers in the area; and the consequent halt in admitting patients.
- The point of approach by our space brothers and sisters was to intervene, and to neutralize the effect, and by subsequent calling of the 'sylphs' to the rescue.
- Furthermore, our space brothers and sisters have been engaged in constant counter balancing the effects of earthquake, tsunamis, volcanic eruptions, extremes weather conditions through manipulating and working with electromagnetic energies of the Earth and her tectonic plate structure.
- This has resulted in a 'coming down' effect and reduction of the severity of the earthquakes as well as diffusion of the clouds and weather correction via manipulation of atmospheric electromagnetic wave propagation.
- This is particularly tedious regarding the Dark Cabal's adverse weather interference and artificial geological excitation via use of the High-Frequency Active Auroral Research Project (HAARP) weaponry and through use of chemtrails.
- Going back to the incipient point of creation of the planet Earth we see that our space brothers and sisters have had a major role to effect the evolution of the planet to what she is now, or better yet, to what she once was, i.e., 'Eden.'
- During the so-called "evolution" of this planet, bacteria, plants, animals, fish, birds, and insects were all imported from other star systems.
- This accounts for the rich diversity of life on Earth.
- Most recently four races of men and women were brought here.
- Many of our brothers and sisters from the stars have been on this planet for many thousands of years, in one or more of the forms previously discussed.

- The Andromedans have at various times interfered with, influenced, and nurtured Earth human life.
- The Andromedans indicate that the construction of the pyramids in Egypt and elsewhere was undertaken under Andromedan's directions and with their assistance.
- Everything from the design of the pyramids to the cutting and moving of the stones was with the assistance of our off-planet sisters and brothers with the Atlantean and their followers.
- Our sisters and brothers of the stars imported much of our technology.
- This occurred either by direct physical interface with Earth humans, by suggestions in dreams, from "insights," or from the reverse engineering technologies from recovered saucers.
- On the other hand, the beginnings of our major religions were at the insistence of extraterrestrials from distant star systems.
- They demanded worship as beings of a higher order. Since those days those of ETs who have not been infused with the Light, they have been involved in many schemes to seize control and enslave Earth humans.
- As things stand today, our religions generally do not recognize the off-planet influences that gave birth to them.
- Rather, they choose a route of disinformation to their followers.
- Our monetary system is under the control of agents of extraterrestrial origins.
- Off-planet beings control our governments either directly or indirectly through their influence.
- Our science, education, medical system, and legal system are all heavily influenced by those who would control others for their own ends.
- However there is more to the story than the assembling of a vast armada of starships who are lighting the planet in response to Earth's cry for help.
- All of the star nations also contributed beings of Light who now walk among us, are totally in service to others.
- They are beings who seek to enlighten the Darkness on our planet.
- They are here among us both in physical form and in non-physical higher vibrations.

- Those of them in human form walk the halls of our governments
- They are members of our military.
- They work in critical positions in our banks and corporations.
- They are teachers to your children.
- They contend they are helping to transform our civilization from predominately fear-based to predominately love-based in compliance to the Prime Creator's directive and the Divine Plan for humanity.
- Those of them in the non-physical communicate with us.
- There are many aboard the starships who communicate with Earth humans.
- There are those of them who live in the households of lightworkers as supporters and advisors.
- They provide a continuous link to the collective that surrounds our planet.
- Human lightworkers, along with those from other star systems, are anchoring the Light from the cosmos, and retransmitting it to those with whom they come in contact.
- Our planet is indeed lighting up, based on a joint effort between those living among us and our own individual efforts, coupled with the great Light from the celestials and from the Universe.
- It is a wondrous symphony of Light.
- It is irresistible to any who are open to it; it is overwhelming to those who cling to the Darkness.
- In a very short time all who are of the Light will find themselves in a world of love.
- Many who have no knowledge of lightworkers are awakening.
- Many will awaken at the last moment.
- And these are the myriad of ways in which Light is coming to Earth through our sisters and brothers of the stars.
- Each of these points of Light is infusing other humans like a candle lights the Darkness.
- These points of Light are encouraging, consciously or unconsciously, many who are now questioning traditional ways of behaving, questioning the structures

in their lives and the reasons behind those structures, and standing up for the truth and love of a better way to live.

- The sum total of all these efforts from our brothers and sisters of the stars is a massive infusion of Light that is overcoming the final vestiges of the Dark energy.
- There is no doubt that the new Earth, with a preponderance of Light, will emerge within the next few months.
