

Significance of Earth and her Human Inhabitants

Mohsen Paul Sarfarazi, Ph.D.

March 3, 2012

- The original inhabitants of Earth are among the oldest souls whose creations date back to the dawn of creation, when God imploded as to create 'souls.'
- These souls were initially part of a group of 'oversouls' created by God during the early days of this universe.
- We are physical manifestation of one of these great oversouls.
- Our separable soul is an individuated piece of this great oversoul, created for this lifetime.
- Our soul will return to our oversoul as soon as our physical manifestation is completed.
- The purpose of the infinite cosmos is to allow Creator to know himself in every way.
- As a result, the universe has been expanding ever since the time of its first creation.
- The beings in the higher planes of existence, those with much higher consciousness vibrating at significantly higher frequency rates had conjectured that the purpose of creation was to allow the Creator to find a reflection of himself.
- The Creator was waiting for the reflection that Earth-humans have now given.
- The creator now decrees that the universe begin to contract and ALL THAT THERE IS eventually converges with HIM.
- The creator now is calling us 'home' by wanting us to undergo our most significant transformation yet, and eventually join HIM at much higher planes.
- Of course the entire process will take billions of years starting from our time of transformation.
- It is, also, totally appropriate that we, humans who have undergone significant transformations in our lifetime, should be the ones to announce the contraction of the universe.

- How can we tell that Earth is indeed undergoing a transformation rather than just another cycle of change?
- It is the combination of events.
- Never before there has been the energies of change in such concentration.
- Never before have we had earthquakes, floods, and volcanoes, coupled with rebellion to gain freedoms, coupled with monetary system failures, coupled with extraordinary energies from beyond the planet, coupled with the gathering of millions of space sisters and brothers, coupled with individual reactions to these energies.
- There are currently thousands of giant mother-ships above us in our stratosphere with millions of star people on board from all over galaxies and even universes.
- Everyone is anxiously awaiting the completion of our transformation and is striving to get a good front seat to observe everything without a loss of moment of their anticipation.
- Among these space ships are those from distinct galaxies and even universes who have come here to witness our metamorphosis as they perceive these changes to have a direct bearing on them and their future existence.
- Therefore, the process of ascension is not totally pertinent to us only, and there are many who strongly feel that it has a direct impact on them.
- For example, the Andromedans, Pleiadians, Serians, and others indicate to us that they have some of their relatives among us who incarnated on Earth in order to gain experience and education regarding life under condition of duality.
- These are beings of higher consciousness who have a great interest in us succeeding ascension and are diligently assisting us to awaken and begin to remember our heritage, and to recognize the tyranny that we are enduring under the oppression of the Lucifer's minions, the Illuminati.
- They have been communicating with frequently to apprise of the status quo we are under politically, psychologically, as well as spiritually.
- They have even had more of their own kind incarnating as Earth inhabitants under the project entitled 'starseed program' as well as providing us with

‘walk-in’ in order to generate a pool of ‘lightworkers’ to negotiate with Illuminati in the hope of driving them away or having them relinquish their present hold on the planet.

- It is estimated that there are at least millions of these space brothers and sisters walking among us.
- They are planning to inform us of our true history soon as what has been presented to us has been carefully fabricated with significant facts deleted or distorted deliberately as contradicts with their clandestine suppressive rule on us and desire for its longevity and continuous progression.
- They have been equally illusory and misleading regarding the account of religious dogmas and their spiritual implications recorded in various religious books faithfully charted around the globe.
- Thanks to our galactic and extragalactic brothers and sisters some of us have come to learn of fractal pieces of information regarding Creation, God, and various other points of historical and spiritual significance.
- The idea behind awakening is to search within and ‘remember’ or intuitively deduce these facts by ourselves.
- Of course, this is probable and more easily attainable as we increase our vibrational frequency this leads to gaining higher consciousness of ourselves and the state of affairs regarding our surroundings we see or are presented to us.
- At the moment, the major media outlets are still owned, and consequently under full control of Illuminati, being carefully censored and manipulated as to serve their agenda of deceit and suppression.
- Aboard the Andromedan starship Athabantian are clustered great numbers of magnificent souls from around this universe, souls who are One with God.
- These extraordinary and highly evolved souls have the capability of manifesting individuated souls for this particular moment within a quasi-physical posture who they intend to incorporate in the new Earth.
- Athabantian is like other great starships near your planet which we are filled with similar exceptional souls who are also sending their light to Earth and our people, and are here to see us ascend.

- The density of souls clustered about our planet is currently so great that is totally unprecedented in the entire history of our universe and beyond.
- Never before has there been such a collection of souls in the vicinity of a single planet.
- They are all here to assist and to witness the transformation of Earth and her humans.
- They say they 'are feeling the energies of transformation as never before.'
- In addition to impacting Earth, these energies are impacting individual Earth-humans.
- These are the energies that manifest themselves as a desire for freedom, a desire to know oneself, to assert who you really are, to throw off the shackles of domination, and to love one another as brothers and sisters.
- These are the energies of Oneness, to assist us see ourselves as One with all.
- One with the rocks, the plants, the animals, and with each and every one of our human brothers and sisters.
- It is this energy of Oneness that will ultimately topple governments, collapse monetary systems, and dissolve religions.
- It is this energy of Oneness that will cause peace in the animal kingdom, causing the lion to lay down with the lamb.
- The energy of Oneness will displace the energy of discrimination, the energy of war, the energy of greed, and the energy of fear.
- The energy of Oneness will ultimately assist us to become who you really are.
- These are indubiously extraordinary times in the memoires of the universe.
- This is not yet another cycle, another period of abnormality, another ice age, another environmental anomaly, or even a cycle leading to ascension.
- First of all, there has never been an incident in the chronicles of this or another universe culminating in mass ascension. All previous ascensions have taken place individually, in a one by one case.
- Secondly, never before people have ascended with their bodies and their full instant memories intact.
- No ascension has ever involved the participation of the Creator, the divinity, and such enormous involvement of higher sentient beings.

- No transformation has ever curtailed the use of such colossal amount of light or divine energies.
- No ascension process has required such preparation, such complex strategies to see it succeed.
- Finally, no other ascension or any other event has ever triggered the reversal of the expansion of the universe and advent of universe contraction which will eventually lead to return of ALL THAT THERE IS to a point of singularity, that of the creator.
