

The Impact of Religion on Mankind

Mohsen Paul Sarfarazi, Ph.D.

July 1, 2012

- There is no doubt that amidst the Dark-infested of bondage-driven duality of the past 13 millennia the advent of religion has had some virtuous effect on humanity.
- It has served as to not allow mankind get utterly separated from the beloved Creator, and to a large extent has kept humanity in line with a certain blend of spirituality.
- Of particular interest is the inclusion of certain intuitive beliefs in ways of tales, idioms, and slogans by our forefathers and foremothers with religious accounts that hold true to this date as the undeniable Truth of the Almighty.
- To site an example, we are told that we should value our intuitions and discern with our hearts rather than our conscious mind regarding making certain decisions such as marriage, or having children, etc.
- In this regard, it is apparent that heart is given the proper value that it deserves.
- Recent research indicates that our heart is by far a much more sophisticated neural organ than the brain.
- Furthermore, the advantage of monoistic heart-based intuitive response over duality-driven brain decision is quite apparent.
- It is clear while the logical duality-based brain provides a binary decision of opposing polarities; heart's decision is completely set on a single viable solution.
- In addition, intuitive 'thinking' is supported by the Higherself that is privy of accessing the multidimensional consciousness of the Realm of Angelics residing in the ever-expansive dominion of the antimatter Cosmos.

- There are numerous other such examples testifying to the wisdom of our forefathers/foremothers.
- Unfortunately, there has been the deliberate infusion of Dark's agenda by introducing hypocrisy and superstition in Man's religious doctrine as to subjugate mankind to fear so humanity remains docile, in dread of eternal punishment and being cast to 'Hell' and oblivion.
- This program has undoubtedly ensured that mankind remains in low consciousness, and indeed, has accentuated the probability that humanity is forever doomed to obscurity.
- In this regard, religion has been yet another factor serving Dark's contempt in its struggle for balancing mankind's gift for forward evolution, giving rise to stagnation or somewhat diminishing of his/her natural frequency of vibration, creating a quasi-static state of consciousness.
- The constant concern for 'illusional' survivability and the poverty-stricken world have engaged mankind in search of acquiring wealth to a point of redundancy, which has condemned humanity to utter forgetfulness and even slumber regarding his/her God-spark essence.
- This has been exasperated by the continual illusionary embedment of the notion that mankind never amounts to anything significant, thus creating a sense of inferiority complex in each and every individuals.
- As a result, humanity has totally forgotten its heritage.
- Deprived from its inherent design of multidimensionality, humanity is confined to lurk in the Realm of matter only of high density, strongly influenced by gravity in a domain of physicality only.
- Here is what Metatron says about the subject:
- If we were to redefine what our religious texts consider as sin, it would not be in terms of the commandments, rather it would be: "knowledge not utilized".
- Taking actions we know to be incorrect, actions in conflict to our highest beliefs.
- None of our present major religions offer the 'full circle', the complete truth on the veritable nature of our reality.

- Each hold a piece, but are riddled with inaccurate insertions.
- None even acknowledge the obvious premise of humanities true 'extra-terrestrial' heritage. Most speak in skewed metaphor.
- Many seek control through archaic fear and reinforce mental programming that obstructs avenues of self-empowerment by instilling the concept of original sin and fires of hell and damnation.
- All of Humanity are Beings of Light, powerful spiritual consciousness, that are sparks of the Divine.
- The difference between Humanity and Angels is that Humans are an aspect of the Divine that evolves back into God expansion plurality having chosen to experience free will and relearn creation through that magnanimous lens.
- Angels ARE, exquisitely and splendidly ARE, and always have been 'Keepers of Light' place holders of this space and non-space of the eternal expanding 'NOW' of Alpha and Omega.

Supreme Gestalt

- The religious teaching of 'Fallen Angels' is also a fear based inaccuracy.
- There is indeed a 'Conscious Keeper' of the specific Law of Physics that enables polarity/duality, which is the force that enables the 'University of Earth'.
- And within that school of the duality causal plane, humanity is able to master the responsibility of creative forces.
- There are no evil or fallen Angels! Period.
- There is no vengeful God in the heavens.
- There are no Angels to fear.
- It is indeed a skewed, archaic misunderstood analogy of the duality force.
- The only demons, the only evil that exists in duality planes are those created by inaccurate thought in the learning process of 'free-will'.
- There are no 'fallen angels'.
- How could a Being of Light created by Divine Source divert from what it is?
- Angels, do not have 'free-will' in your terms. Rather they have Divine Will.

- **The Supreme Gestalt of 'All That Is' is the substance of the reality that underlies all appearances and manifestations that are called Life, including matter, anti-matter, non-matter, energy and non-energy, thought and the absence of thought.**
- **And, there is that which exists even beyond this.**
- **We may not fully comprehend this axiom from our duality perspective, or perhaps do not feel that this is within our field of conception.**
- **But it is our discernment, ever, that must be honored in order to expand as we grow into greater awareness of our God Self.**
- **Many of our religious texts and scriptures tell us that 'God' created mankind in 'his' own image.**
- **We even see 'God' as a patriarchal male with a human-like body.**
- **It is the same mental thought process that logically images Angels as having human form.**
- **Such celestial images powerfully influence our thoughts and emotions, and thus it is natural that we create understandable images to facilitate our interfacing with the Divine.**
- **There are myriad life forms of Divine Intelligence in the Cosmos that have 'bodies' vastly different from the forms we have on earth.**
- **These are also created in 'Gods' Image.**
- **And so understand the image of God that is life, is conscious light, is LOVE.**
- **Throughout the eons, humanity has tended to consider Ascended Masters, Spiritual Teachers, Group Councils, Deities and benevolent Extra Terrestrials as Angels. They are not.**
- **The Cosmic Council of Light, Ascended Masters, the Sirian-Pleiadean Alliance, are unified entities that operate generally in Councils.**
- **These are representative and advisory disciplines that express tenets, principles, theories and beliefs associated with a body of knowledge.**
- **The Cosmic Council of Light is composed primarily of highly advanced beings that have experienced and completed the lessons of physical duality, and have chosen to empathically assist humanity.**
- **Likewise, many of the Sirian-Pleiadean Alliance has experienced life on earth.**

- **Using Discernment**
- Think NOT that the deity desire to forcefully impose or have us change our chosen stance on God, religion or the nature of our own being.
- Our beliefs, values and chosen opinions are sacred steps of our free-will and are fully endorsed by the ' All That Is', of which we are a Divine Aspect.
- The mode and manner, the expediency and format of our evolution is our own creation, and that is by individual design.
- There can be no other way to complete the University of Earth.
- It is not the role of the Angelic or the Ascended Masters Councils to make choices for us.
- They are holders of information that we may utilize, refashion, reject or accept.
- It is our choice, and each of us will graduate in time.
- Love is ever the key, and cause and effect are great and greater teachers that all of us will learn from.
- Experiencing duality and learning Mastery is why we came to Earth.
- A beautiful completion is occurring on the Earth.
- It is a sacred event that all of us have co created.
- It is time that we illuminate to the great and greater aspect that has always been within us. The dreamer is awakening.
- The expansion of Light is the expansion of Truth, of Understanding, and is the doorway to the return home.
- Like the Angels, we are Beings of Light.
- Yet, most of us have no idea how important we are, and how the evolution that we have created in our selves has expanded the Cosmos.
- Take a moment, and direct your energy to feel the energy of Light, of Angels.
- Feel God and the deity.
- Be absorbed in this angelic countenance of peace and well-being.
- It is a moment of solace.
- It is the energy of Source, of home, of Light, of Love.

- **It is Angelic, and we are feeling the frequency of our nature, of our source nature in Angelic Beingness of Sacred Light.**
- **Every Enlightened Being who has walked the Earth in final Mastery, exuded an energy that feels a lot like what we just felt.**
- **People were attracted to them, loved them.**
- **All life responded, blossomed in their presence.**
- **They created joy, effortlessly, because that is the energy of LIGHT, and we are human angels, and can and will evolve in kind as we return home.**
- **And in that sacred path, the Angelic Realm will honor us.**
- **They await us, and promise to leave the lights on for our serendipitous return.**
