

Life beyond 3D

Mohsen Paul Sarfarazi, Ph.D.

October 21, 2012

- Life beyond 3D entails 'Service' and nothing but Service to humanity and ALL THERE IS.
- There is no longer the concern for earning a paycheck or be plagued by the need to "survive," as there is tranquility and prosperity for ALL, while living in a cooperative state of Oneness, with a 'collective' concern for maintaining the same for ALL.
- All souls now subscribe to and join a society of Beings with comparable level of consciousness, belonging to a Multiverse-Wide-Network or 'Web' [MWW?], with the privilege of having access to and sharing all the knowledge acquired by ALL.
- The most important requisite is to subscribe to a doctrine of 'Oneness' or 'Unity' with the dedicated respect for the science of Compassion and Unconditional Love, culminating in ever-cooperative efforts with the concern for prosperity for ALL.
- Therefore, there is no longer any hint or "need" for competition, "security" or "secrecy" for that matter.
- Imagine one individual with the mind or knowledge of a 'collective!'
- This will culminate in utter efficiency and optimization of the learning process as well as creativity, without the "fear" for piracy, competition, or fear of "survivability."
- Of course, the latter was invented by the devious minds of our oppressors in 3D reality in favor of seeking supremacy, with complete futility of extreme lopsided self-indulgence for a few via tight mass control and outright slavery.
- The sad thing is that the ALL MIGHTY God has provided abundantly for ALL, eliminating any need for trickery in order to engage and "win" or succeed in

a useless game of competition necessitated by the conditioned fear of “survivability” in us through mind control, erroneously believing in the absurd theory of “survival of the fittest.”

- **There is, indeed, abundance for ALL which should lead to prosperity for ALL.**
- **This way, the negative traits of jealousy and greed, accompanied with the concerns for supremacy, control, or survivability could be substituted with productive endeavors for creativity, knowledge, and raising consciousness, the latter being the most prominent aspect of the ‘Divine Plan’ of our Creator for us to Self-evolve in a forward manner.**
- **There is, obviously, still a lot to learn, so the lessons continue.**
- **However, the phenomenon of ‘Free Will’ becomes less pronounced, especially when employed by and being at the ‘Service’ of the All Mighty.**
- **Here, obedience becomes of principal and dominant necessity.**
- **There is much to learn, and there are way too many unfamiliar things to get acquainted with and adopt in life.**
- **The best solution is to just follow directives, and meanwhile observe and learn.**
- **The most fundamental requisite is to almost completely turn off the conscious mind and follow one’s intuitions.**
- **The over-exaggerated need for usage of brain, as is so-emphasized in 3D, disappears.**
- **It is now becoming well-known through scientific laboratory experimentation, as well as information being downloaded from higher dimensions, that actually our heart is the most sophisticated neurological organ and energetic field within our physical body.**
- **It is, therefore, wise to make use of our heart through adoption of intuitive thoughts and emotions rather than employing the so outdated, ‘old energy’ and ‘3D brain’ in our higher state of consciousness.**
- **After all, the brain was meant as a work station, a terminal, to access the CPU of the higher mind [through meditation and intuition], and not as an independent, self-sufficient equipment to process ‘logic’ circuits and come**

up with calculations or evaluations that can be relied upon as crystal clear in precision.

- The extent of the information, knowledge or 'Truth' of the brain is limited to what has been stored on its hard drive as a result of experimentation, observation, and lessons learned during our current incarnation and sojourns in our present 3D life.
- The brain carries no residual memory from our former reincarnations whatsoever, nor it is hard-wired to the higher dimension to constantly and easily process streams of data for our usage.
- Although the 'new' data gathered while harvesting the field of Duality on 3D Earth may be useful, with even some of which overlapping with the data field of the previous reincarnations of our soul, its volume as well as 'refinement' in crystalline quality, are too elementary to be utilized as a 'guru' Source for us to utilize or rely upon.
- The true 'guru,' indeed, resides WITHIN.
- It is our Higher Self, the soul, the parent of ALL our lower consciousness sources, beings, existing in our parallel realities, may be in diverse forms, including our very 'Self' with its identity we are so familiar with consciously, and what we call ourselves.
- With utilization of our inherent intuitive sense, the very gateway to our Higher Self, we are much safer in making crystal clear decisions which are not tainted by the 3D duality and confusion of 'yes and no,' 'this and that,' and 'but and ifs.'
- It is clear that duality is characterized by distinct polarized opposites and no program of logic, statistics, or otherwise can safeguard against its extremely different solutions or possibilities of accuracy and exactness.
- On the other hand, intuitive solutions are singular in nature, being 'particular,' emanating from oneness inherent WITHIN.
- Therefore, intuitive answers are precise and reliable, unless contaminated by the conjectures of the conscious mind.

- Care must be taken to completely turn off the active or conscious mind while resorting to downloading and utilizing the intuitive responses of our inner wisdom.
- It is an endeavor that requires some efforts.
- It is usually achieved in a totally relaxed, tranquil, serene state of mind without any possibility of chatter induced by 3D duality as to engage the subconscious mind completely, and through its immediate validation with any doubt or fear of inaccuracy or falsehood.
- Of course, as one becomes more connected and attuned to one's inner Higher Self, the process becomes easier and runs with much smoothness to a point that a stream of thoughts and emotions are then received by the subconscious mind in certain regularity.
- And, this is when the Self begins to become One or nicely connected with the Higher Self, and the inner Higher consciousness starts to meld or integrate with our conscious reality, culminating in 'Illumination' and natural 'Wisdom.'
- Then one arises to a more permanent state of higher or superior consciousness, one that is referred to as a 'guru.'
- However, one only needs to resort to the one true guru that resides or initiates from WITHIN.
- Resorting to the advice of the other 'outside' gurus is often futile and certainly not recommended.
- A 'guru' has intimate connection with One's Higher Self, and thus knows best what is proper for one Self and not others.
- Providing such advice for others is often the work of a charlatan.
- Although, clairvoyance or generally clairsentience is a fact of life and is real, and there are those who are blessed with such inherent capabilities, often as a result of having acquired higher consciousness or being subject to genetic activation of their certain DNA, offering advice and claiming to have such wisdom is improper and highly questionable.

- If one encounters a particular credit-worthy clairvoyant who could go in a trance and provide images of one's "future," it might be viable for one to take such 'readings' into consideration.
- However, no one can tell you what to do other than YOUR SELF.
- Take the information with discernment and resort to inner advice intuitively for clarity and direction.
- Meditation and Self-reflection are the real keys to higher consciousness.
- They provide means for Self-discovery.
- All knowledge resides WITHIN.
- You are Divine, and only need to ascertain YOUR own divinity.
- YOU are a creator of YOUR own reality, and indeed, a co-creator of the cosmos you reside within.
- You have ALL the Divine powers you may fantasize, but it needs efforts to unravel and having them manifested in your reality.
- The key to acquire them is resurrection or ascension which has a requisite of acquiring or re-establishing your higher consciousness.
- The 3D life is an "Illusion" in the context that it is only a purposeful 'game,' one that you need to master in order to raise your consciousness.
- The efficiency in which you acquire forward evolution depends upon your attitude, faith, and industriousness.
- You need to invoke a beacon of Light within you while on lower planes in order to guide and direct you to make correct decisions as to contribute to your increased consciousness and forward evolution.
- The more you abstain from Self-reflection and desist or refrain from 'spirituality' by disengaging your conscience, avoid your subconscious mind and detour to self-indulge in Physical self-satisfaction through greed, carnal desire, materialism, accumulation of matter, and invoking your ego-personality, the more you remain stagnant in your quest for higher consciousness.
- Thus, the more you will need to regress and repeat the very same.
- Each incarnation has a purposeful intent.
- It is devised and designed by your very Higher Self prior to birth.

- The reason for engaging in a 3D 'game' of duality is to entice your Self, a fragment of your soul, to learn, to record its findings, and to report to the soul to integrate into the entirety of your consciousness.
- The more effectively you optimize your efforts, the sooner you ascend in the rank of consciousness, thereby, finding access to new and improved quality of existence.
- Since the intuitions are the product of connection to higher consciousness as may be typified by one's higher Self, .e.g., Oversoul, Avatar, or may be Rishi, it is of crucial importance to stay connected and not be 'separated' from the higher 'Source' even for an instant.
- And, the best way to do this is to switch off the conscious mind or render it inactive.
- Meditation and Inner Self Refection [ISR] should be the state of the mind and almost the constant preferred way of life.
- Notice, as ascension first requires clearing and cleansing of karma, victim consciousness, and repairment of all our genetics of our 'former' 3D sojourns, access to higher planes of consciousness is no longer restricted or tedious.
- Furthermore, the ego-personality must first die and vanquish prior to ascension, so it is no longer a deterrent in achieving higher spirituality.
- However, we must note that although we will all subscribe and follow the doctrine of collective consciousness and being connected with one another, we still possess individuality and a separate identity as collective consciousness is not preordained to be a hive-type mentality.
- Thus, one has to be extremely careful when one is obliged to make personal decisions without being 'dictated' by one or another individual, or even in a collective sense.
- And, this is the status quo while residing on relatively low planes of consciousness beyond 3D, say, the fifth.
- Remember, the condition of 'Free Will' ceases to exist continuously when one ascends to even higher planes of consciousness, and become fully absorbed by deity in 'Service' to ALL THERE IS.

- **While on the 5th and comparable dimensions, one is still to follow one's instinct and intuition, and learn to stay 'connected' at all times, while one observes, and absorbs the TRUTH of God.**
- **Although life in 5D does no longer provide the opportunity for Self-indulgence, and is align the path of following and staying within a collective group with the intent and ambition of seeking and administering the concept of 'Good for ALL,' it still incorporates individuality and creativity on an independent basis as to utilize uniqueness and originality.**
